Duplex Penthouses

5th floor (first level)

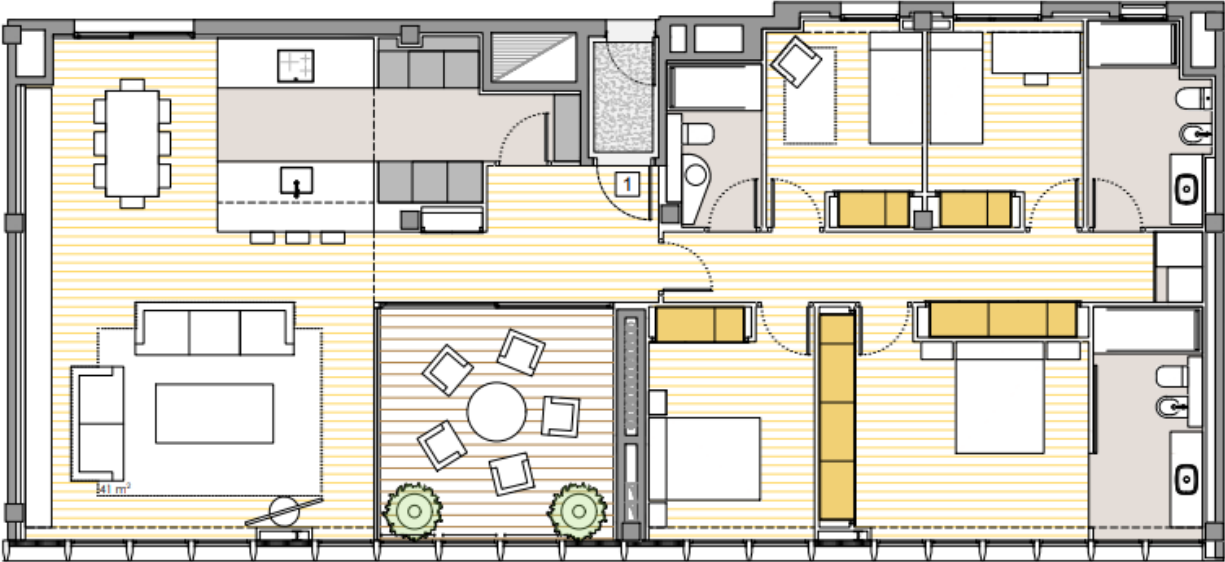

6th floor (second level)

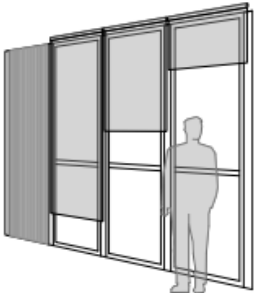

Interior Penthouses

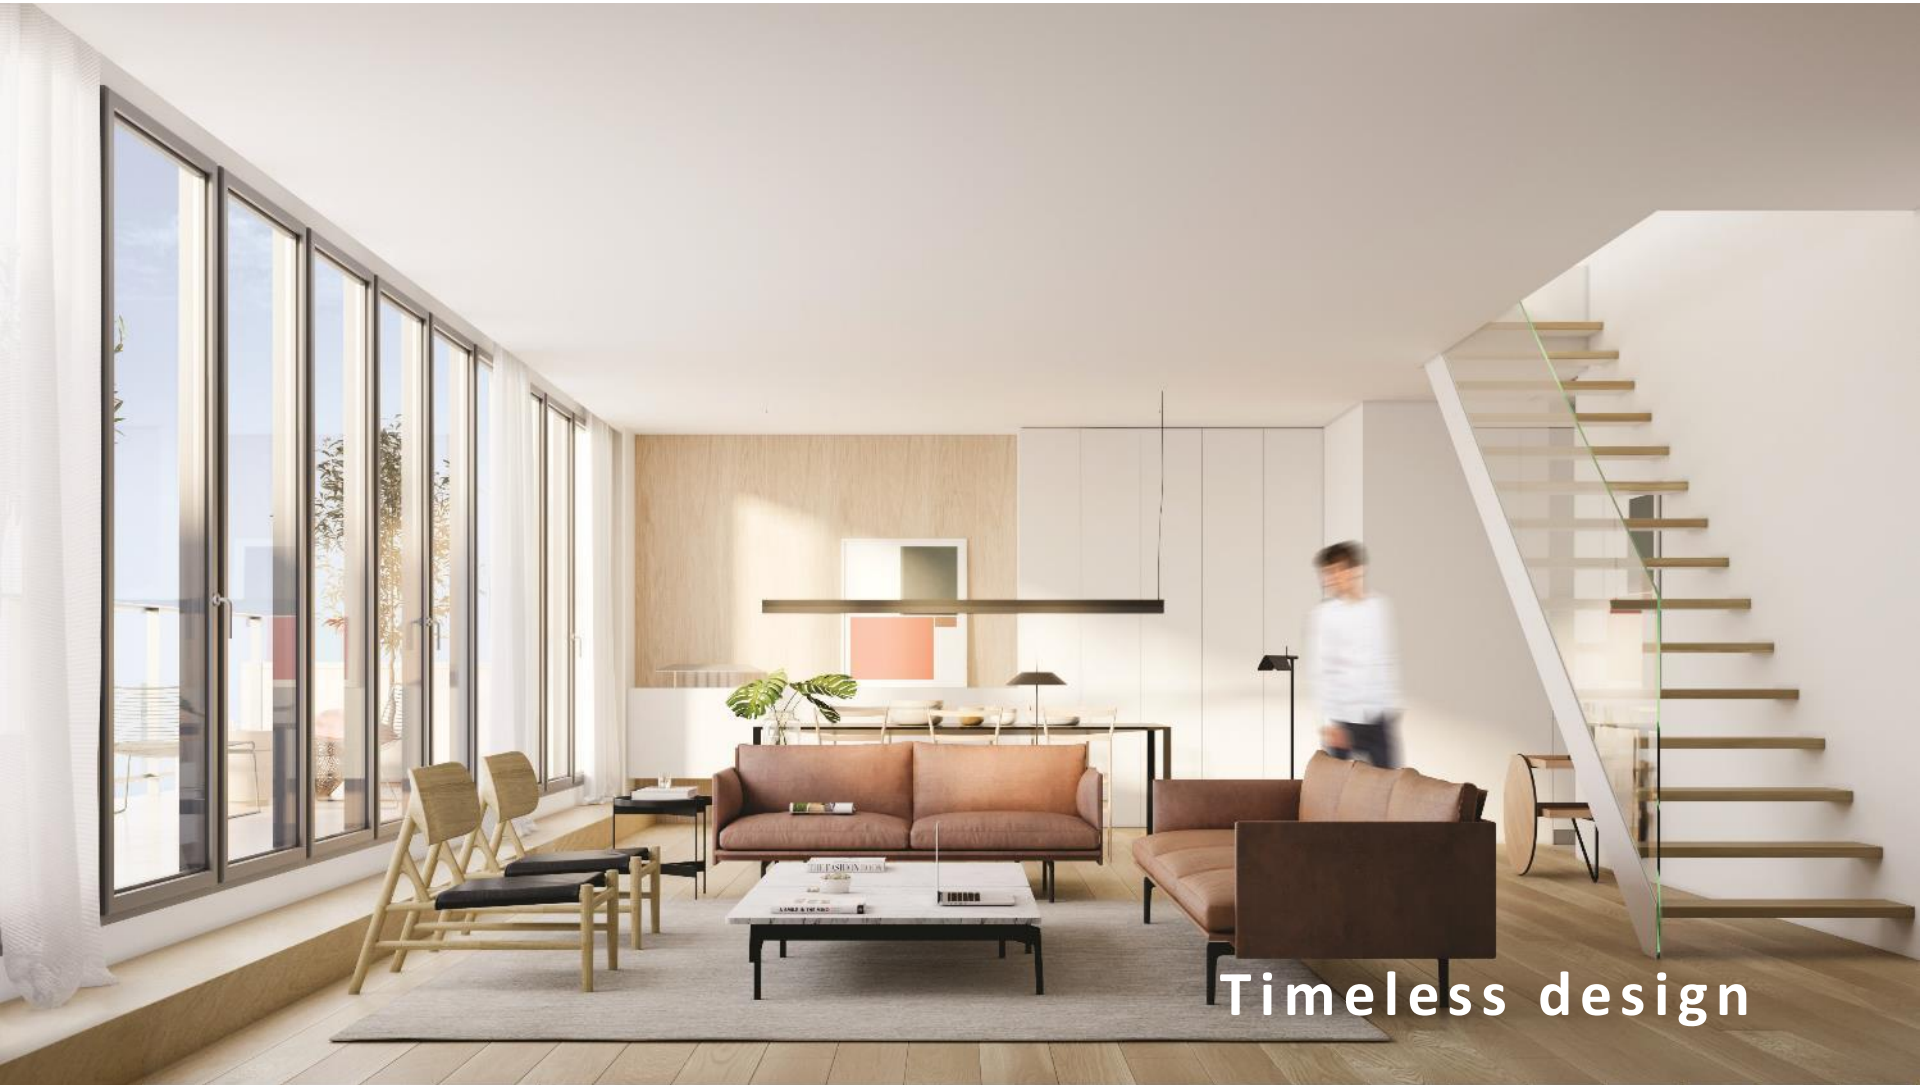

PATIO MANZANA

SUP. CONSTRUIDA INT. 184.67 m²

Values

Timeless design

Neutral colors. Solid materials. Light wood. White walls and carpentry.
Highest quality.

Natural light

Large windows that occupy the maximum possible surface of the façade. Sliding doors that project from the floor to the ceiling, like small walls that disappear so that light enters to the very heart of the property.

Regardless of its surface, the property is spacious. The day and night areas are rigorously studied.

Space and balance

Flexibility

Personal circumstances change. The property adapts.

Rationality

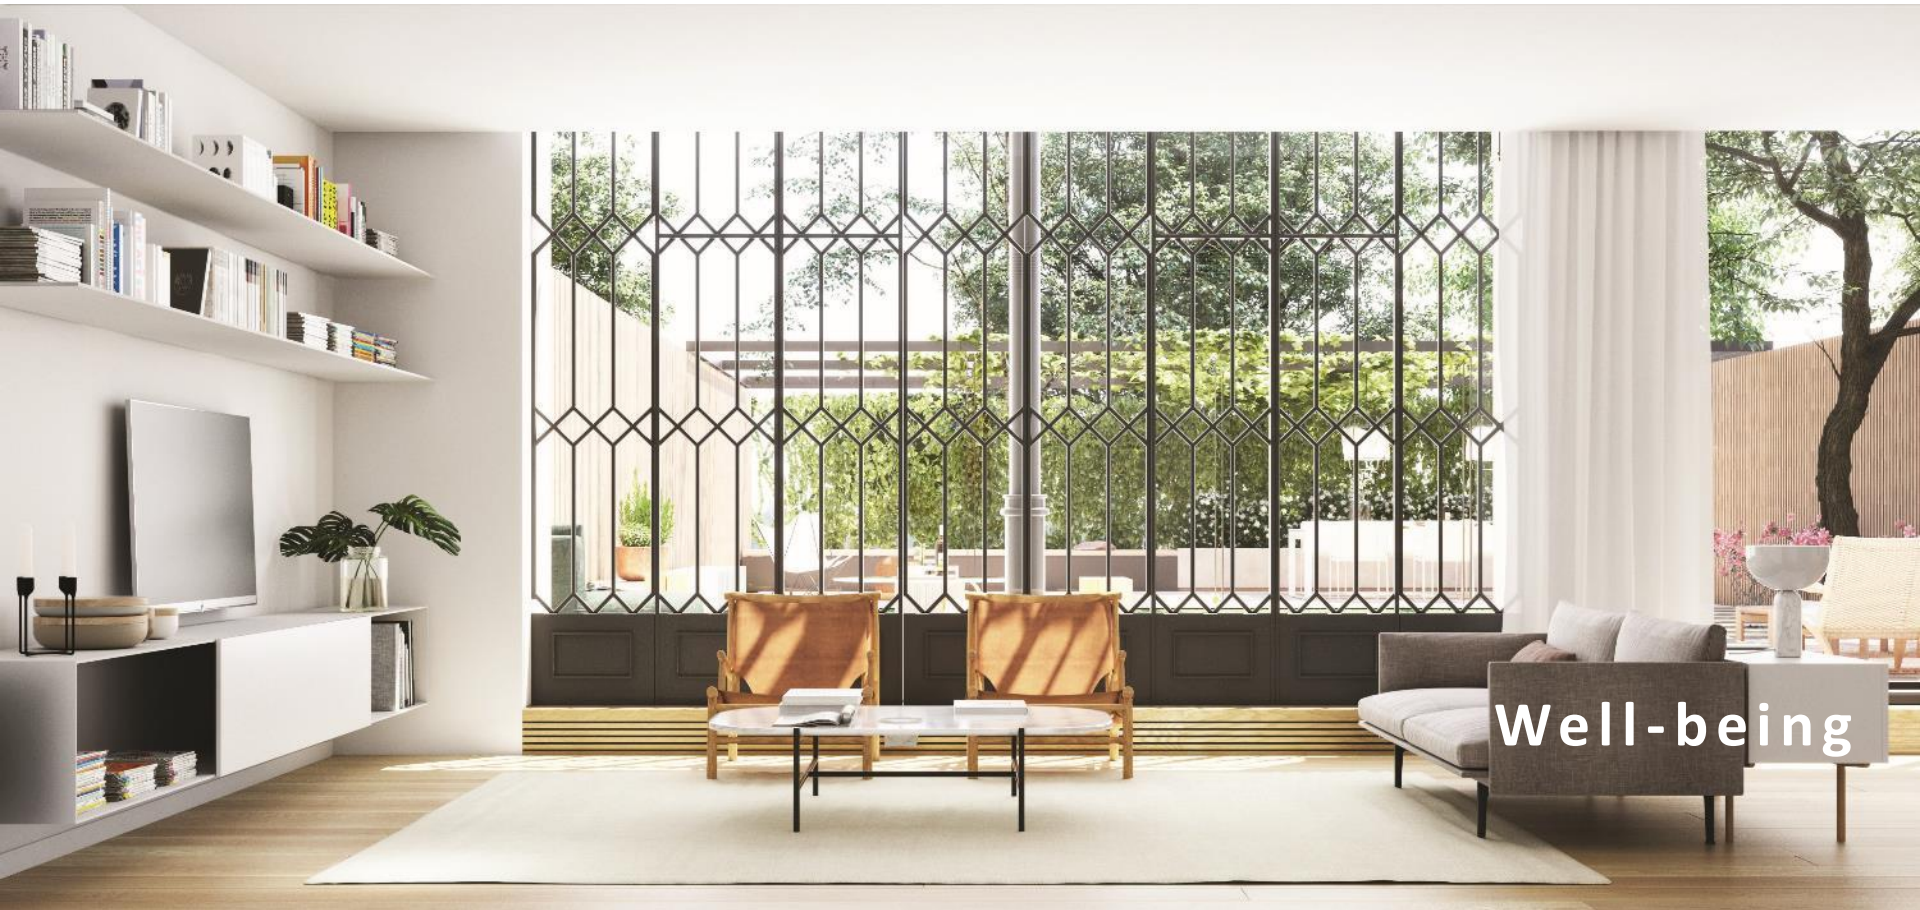

Efficiently distributed kitchen where the preparation, cooking and cleaning areas are well defined.

Efficiency

Complete bathrooms with large shower cabins. The sanitary water, heating and air conditioning by aérothermal provide maximum comfort with high energy savings.

Calculated properties, to satisfy all the needs of the end user.
