# IBIZA, QUALITY OF LIFE

Ibiza is a Mediterranean paradise renowned for its vibrant night-life, idyllic beaches, and cosmopolitan culture. Among the most sought-after locations on the island is Playa d'en Bossa, home to Opal. Ibiza's Mediterranean climate with warm summers and mild winters, offers an unrivalled quality of life. The island's longest white sandy beach is just a short walk away, offering the perfect setting to enjoy the sea and sun.

Ibiza is renowned for its unique charm, blending natural beauty with rich local

culture. Playa d'en Bossa epitomises this, with the modern, exclusive architecture of Opal blending seamlessly into the surroundings. The nearby areas are filled with a variety of commercial, cultural, and leisure amenities. Just minutes from Ibiza town, residents can enjoy an afternoon at the cinema, a fine dining experience, or shopping at local fashion boutiques. Additionally, the proximity to the port and the historic old town adds a vibrant and authentic character to the area.

## Local delicacies

Ibiza's cuisine is rich and diverse, reflecting its Mediterranean heritage. Local markets offer a wide range of fresh produce, from fish and seafood to seasonal fruits and vegetables. Traditional dishes include the famous "bullit de peix," a fish stew with potatoes, and "flaó," a delightful cheesecake flavoured with mint. This culinary experience is enhanced by a selection of local wines, perfect for complementing any meal.

## Outdoor activities

Opal's prime location in Playa d'en Bossa allows residents to enjoy a wide range of outdoor activities. From water sports like sailing, diving, and paddle boarding to relaxing beach walks.

The island also offers hiking trails and cycling routes that showcase its breathtaking landscapes. World-renowned beach clubs and nightclubs offer lively entertainment, while quieter, family-friendly areas provide a peaceful retreat.

Moreover, the proximity to schools, museums, and the University of the Balearic Islands makes this area ideal for both families and those seeking a second home.

# THE PROJECT

Opal is a unique residential development located in Playa d'en Bossa, Ibiza, designed to offer all the features a modern residence requires, creating the perfect place to live.

The development comprises 90 homes, featuring one, two, and three-bedrooms, spread across three four-storey buildings, all harmoniously integrated into the surroundings. Each property includes a parking space and storage room, with some featuring terraces, and the complex boasts green areas and various leisure spaces.

This development has been meticulously crafted with every detail in mind to become your future home. Discover homes that boast elegant architecture and a carefully curated array of premium finishes. The properties boast exceptional design and abundant natural light, featuring expansive, open-plan living spaces and a layout that cleverly distinguishes between daytime and night-time zones.

## COMMUNAL AREAS

Opal features a communal area that boasts a pool, solarium, chill-out zone, and gym, all conveniently situated on the ground floor. Experience contemporary elegance with white lacquered interior carpentry, fully equipped kitchens, heating by air conditioning with heat pumps, and individual aerothermal units for hot water production. Explore the option of customising your home with a variety of flooring and tiling selections.

Experience your new home in a unique setting, created to ensure maximum well-being, designed to meet all your needs and provide enhanced comfort and quality in a remarkable location with outstanding amenities.

# INNOVATION

## ENERGY RATING

We design buildings that are energy-efficient, exceptionally insulated, and perfectly sealed against the elements. Our homes are created with an emphasis on comfort and sustainability, incorporating innovative technology to enhance your daily life.

This results in an estimated 89% energy saving compared to homes with an F energy rating, translating into significant cost savings\*.

Our building has been classified with a B Energy Rating, which reduces CO<sub>2</sub> emissions and significantly lowers the building's energy demand for heating, cooling, and hot water.

Annual savings in gas and electricity can be as high as €750\*\*.

\*Estimate based on a typical 95m<sup>2</sup> home with a B rating, compared to a reference home with an F rating, in accordance with the "Energy Efficiency Certification for Buildings" report published by IDAE and the Ministry of Industry, Energy and Tourism in November 2015, and other relevant regulations. \*\*Minimum guaranteed savings in hot water consumption, based on the building's location and occupancy values according to the current applicable standard.

# INNOVATION

## The homes feature a humidity-controlled ventilation system, providing:

- Controlled mechanical ventilation of the home.
- Continuous air extraction from bathrooms and kitchens, with fresh air entering through bedrooms and living rooms.
- Micro-ventilation function in windows.
- This system enhances thermal insulation and reduces energy consumption compared to the minimum regulatory requirements.

## Thermal Insulation

The enhanced insulation is achieved through improvements to the thermal envelope, doubling façade and carpentry insulation, and incorporating low-E glass for better energy efficiency.

## Individual aérothermal system for DHW Production

- Greater efficiency than conventional boilers.
- Lower fuel consumption.
- Reduced CO<sub>2</sub> emissions.
- Longer equipment lifespan.
